# VSC SILICONE RUBBER COATED GLASS SLEEVING

# **DESCRIPTION**

This sleeving gives both the benefits of an extruded silicone rubber as well as a fibreglass sleeving, giving good strength and high flexibility as well as high dielectric strength at high temperature.

## **APPLICATIONS**

- Harnessing
- Electrical insulation
- Terminal protection

### **PROPERTIES**

- Operating Temperature: -70°C to +200°C
- Thermal Class: H
- Dielectric Strength : Available in 1.5 kV, 2.5 kV, 4 kV and 7.5 kV

# **CHARACTERISTICS**

- Good dielectric strength
- Good mechanical resistance
- Highly flexible
- Flame retardant

### **AVAILABILITY**

Available in a full range of sizes in black or brick red as standard. However other colours are available, call Croylek for details.

# **APPROVALS**

VSC 75 has full UL approval

- File Number E121222
