

F2

**Standard size roller
RO150**

Advantages

- Rotating hook to allow the roller to position itself depending on the running-out direction.
- Safety pawl to prevent the cable from jumping out of the roller during the running-out or tensioning operations.
- Light weight and small overall dimensions for easier use at top of poles.

Characteristics

Corrosion resistant materials.

MWL (down)	Materials	Weight	Packaging unit
150 daN 330 lbs	Hook & elbow : protected steel Sheave : aluminium alloy	0,6 kg 1.3 lbs	1

**Large size roller
RO800**

Advantages

- Rotating hook to allow the roller to position itself depending on the running-out direction.
- Safety pawl to prevent the cable from jumping out of the roller during the running-out or tensioning operations. Open locking position to enable the lineman to operate with his two hands free.
- Light weight for easier and safer operation at top of pole.

Characteristics

Corrosion resistant materials
