# **D**Lunatone

# 0-10V to DALI Converter

Datasheet Interface

Interface for converting 0-10V control signals to DALI dim levels

Art. Nr. 86468352-xxx-P Art. Nr. 86468352-xxx-A

## **D**Lunatone

# 0-10V to DALI Converter Interface

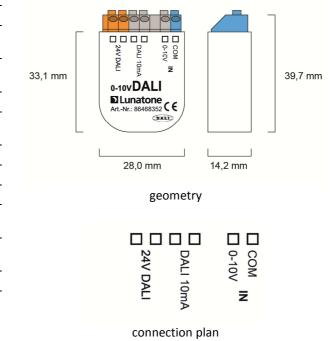

#### Overview

- Compact interface module for the conversion of 0-10V control signals to DALI direct arc power dim levels.
- The interface module provides a DALI sub-line power supply for up to 4 standard DALI ballasts (10mA), up to 64 DALI ballasts controllable with the help of a DALI-Expander.
- The converted value is sent broadcast on the DALI subnet
- A change in the 0-10V input voltage signal (>1%) is used as trigger event.
- The interface module is supplied by either a 12-24V power supply

- Passive input (type P): the module does not supply any voltage at the 0-10V input, suitable to connect 0-10V analog signale (e.g. with a SIEMENS LOGO)
- Type A with active input available on request: the module provides a supply voltage at the 0-10V input, suitable for connecting a (linear) 100kΩpotentiometer
- A galvanic isolation between DALIoutput (10mA) and 0-10V signal input or 24V supply input can be realised with the help of a DALI-Expander.

type	0-10V / DALI Converter
article number	86468352
supply	12V-24V (polarity free)
typ. current consumption	4.1 + current for subnet ballasts
input	0-10V
output	DALI Imax=10mA
function	converter
temperature	0°C-50°C
protection class	IP20
connecting wire cross section	0.5-1.5 mm <sup>2</sup>
wiring length to 0-10V control devices	50 cm
geometry	40 / 28 / 15 mm

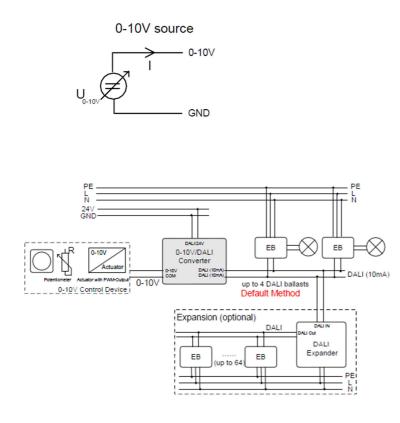

### Specification, Characteristics

### **D**Lunatone

#### Type P: passive 0-10V input

Type A: active 0-10V input

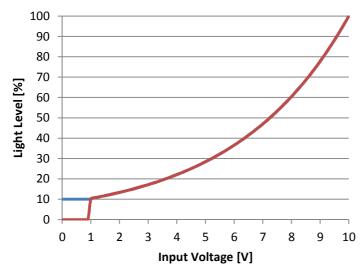

**Hint**: More than 4 DALI-ballasts can be controlled by the use of a DALI-Expander (ArtNr. 89453847, integrated DALI PS for up to 64 DALI-ballasts)

**Hint**: A DALI-circuit with separate DALI power supply can be controlled by a potentiometer using DALI 100k (ArtNr. 86458506) or DALI MC+ (ArtNr. 86459532).

#### 0-10V to DALI conversion

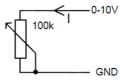

1-25

1-32

The light level is the ouput power of a standard DALI-ballast (IEC62386-102) which is connected to the converter.

Potentiometer

#### **Application: StandAlone Solution**

- 12V-24V powered
- Standalone solution for small DALI subnet (no DALI PS required)
- 0-10V values are sent on the DALI subnet broadcast

#### **Implemented Conversion Curve:**

The input voltage range of 1V-10V is converted to the light level range of the connected DALI ballast.

The input voltage is converted to either 1%-100% or 10% -100% light level (depending on the type)

For a better visualisation the characteristics of the 10% types are shown.

#### ON/OFF:

Depending on the variant the converter behaviour below 1V is different. It is either switched OFF (red characteristic) or the Minimumlevel is sent (blue characteristic).

#### **Purchase Information**

The types vary in dimming range, OFF-function and 0-10V input circuit (active/passive): Types supporting OFF-function:

Art. Nr.: 86468352-001-P	1%-100%, OFF below 1V, 0-10V passive (default)
Art. Nr.: 86468352-001-A	1%-100%, OFF below 1V, 0-10V active
Art. Nr.: 86468352-010-P	10%-100%, OFF below 1V, 0-10V passive
Art. Nr.: 86468352-010-A	10%-100%, OFF below 1V, 0-10V active

Types without OFF-function:

Art. Nr.: 86468352-101-P	1%-100%, 1% below 1V, 0-10V passive
Art. Nr.: 86468352-101-A	1%-100%, 1% below 1V, 0-10V active
Art. Nr.: 86468352-110-P	10%-100%, 10% below 1V, 0-10V passive
Art. Nr.: 86468352-110-A	10%-100%, 10% below 1V, 0-10V active
