

## DV M SN1823 (951 316)

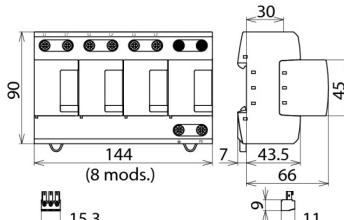

- Prewired spark-gap-based type 1 and type 2 combined lightning current and surge arrester consisting of a base part and plug-in protection modules
- Special type of circuit for Norwegian IT systems, according to NEK 400
- Maximum system availability due to RADAX Flow follow current limitation
- No tripping of 32 A gG fuses up to short-circuit currents of 25 kA<sub>rms</sub>
- Lightning current discharge capacity: 50 kA (10/350 µs)
- Capable of protecting terminal equipment
- Operating state / fault indication by green / red indicator flag in the inspection window
- Easy replacement of protection modules without the use of tools due to module locking system with release button
