

IBSB/IBSBRInsulated Braided Conductor for Circuit Breakers-IBSB100-530-10 (558628MTO)

IBSB/IBSBR is the ideal ready-to-install flexible wire replacement solution that is specifically designed for connections to all molded case circuit breakers, including the most compact breakers on the market. It connects to the front access terminals of the breakers without any additional accessories, such as angular connectors, spreaders, ring terminal connectors or extenders. IBSB/ IBSBR is available in cross section of 25 to 240 mm² (49.34 to 273.65 kcmil), lengths from 165 to 1,130 mm, and 80 to 350 A tinned and 400 to 630 A bare (red) copper.

Manufactured in an ISO 9001 certified proprietary automated facility, IBSB/IBSBR is formed by weaving high-quality electrolytic copper wire to form a durable low voltage connector with maximum flexibility that allows for more compact power connections to circuit breakers. The IBSB/IBSBR allows users to reduce the total size and weight of the installation, improving both design flexibility and assembly aesthetics.

The IBSB/IBSBR features integral pre-punched palms that are ready to connect out of the box. There are no lugs to purchase or install, making connections simpler and faster and eliminating faulty connections due to vibration or fatigue. The insulation is a high-resistance self-extinguishing PVC.

IBSB/IBSBR is compatible with all major brand molded case circuit breakers. Contact your ERIFLEX representative to determine the correct size for your application.

- Suitable for all main molded case circuit breakers
- Resistant to vibration, improving reliability and performance
- Improves assembly flexibility and aesthetics
- Quick and easy installation
- No additional cutting, stripping, crimping and punching needed
- Integral palm without lugs or terminals reduces material and assembly weight
- Small wire diameter provides maximum flexibility
- RoHS compliant

Part Number	IBSB100-530-10
Article Number	558628MTO
Typical Application Current Rating	350 A
Finish	Tinned
	Copper Polyvinylchloride
Dielectric Strength	20 kV/mm
Flammability Rating	UL®94V-0
Max Working Voltage, IEC/UL 758	1,000 VAC

I,500 VDC Max Working Voltage, UL 67 500 VAC/DC Working Temperature 105 °C Max Operating Temperature -50 to 105 °C Wire Diametar 0.15 mm Complies With IEC® 50439.1 IEC® 51439.1 IEC® 51439.1 Cross Section 100 mm² Conductor Width 24 mm Conductor Width 53 0 mm A 9 mm B 11 mm C 31 mm Hole Size 1 (HS1) 10.5 mm Hole Size 2 (HS2) 0.5 mm Unit Weight 0.62 kg Certifications ASS 13 HIS3/0074-PDA Berature Veritas H139 BV Or CR Standard Packaging Quantity 10 pc UPC EAN-13 7090041500402	Part Number	IBSB100-530-10

 ΔT = Temperature of conductors – Internal temperature of panel.

This table indicates the temperature rise produced by chosen current in the given section. This calculation does not take into account the heat dissipation from the switch gear.
