

PROF®

WINTER FLASH WIF18

Glove description:

Synthetic glove, winter-lined, synthetic leather, polyester, fleece, Cat. II, yellow high-viz, grey, reinforced index finger and fingertips, chrome free, open cuff, elasticated 180°, for assembly work

PROPERTIES:

Good fingertip sensitivity, flexible, extra comfortable

SPECIFICATION:

TYPE OF GLOVE: Cold insulation gloves

CATEGORY: Cat. II

SIZE RANGE (EU): 8, 9, 10, 11, 12

PALM MATERIAL: Synthetic leather

BACK MATERIAL: Polyester

LINING: Winter-lined

LINING MATERIAL: Fleece

FASTENING: Open cuff, elasticated 180°

LENGTH RANGE: 230-270 mm

COLOUR: yellow high-viz , grey

PAIRS PER PACKAGE/CARTON: 12/120

DISPLAY: Hangtag

OUTER MATERIAL SPECIFICATION:

Polyurethane 50%, polyester 49%, elastane 1%

INNER MATERIAL SPECIFICATION:

Polyester 100%

DIRECTIONS FOR USE: For PROF gloves and arm protectors CE CAT II EN420 and EN388 (protective gloves against mechanical hazards).

Check the gloves prior to use. Choosing the right glove size is important so that the gloves would not pose a risk to the user (e.g. getting stuck in the machinery). Assess the suitability of the gloves according to workplace conditions.

These gloves meet the standards EN 420 (general requirements) and EN388 (protective gloves against mechanical hazards). Abrasion resistance 1 to 4 (max 4), cut resistance 1 to 5 (max 5), tear resistance 1 to 4 (max 4), puncture resistance 1 to 4 (max 4), cut resistance A to F (TDM EN ISO13997, max F).

Gloves might contain ingredients (e.g. natural rubber) that cause allergic reactions in hypersensitive persons.

Gloves should be stored in a dark, cool and dry place.

Gloves can be gently wiped and washed with mild detergent. Gloves' properties may change in the wash. Gloves should be discarded with waste according to local regulations.
