

Features and Benefits

The MMI and MMI-R are compact wall mounted units for storing and protecting optical fiber. The internal storage spool easily holds 1.5 meters of up to 12 fibers with 900 micron buffers. Both units accept up to six USO modules and can be configured for multimedia using a combination of UTP, ST, SC, and FDDI adapters so that all the outlets may be placed in once centrally located unit.

The MMI has a sturdy snap-on plastic cover and is available in three attractive colors (see above). The MMI-R is a sturdier version of the MMI for high traffic areas and has a graphite grey powdercoated steel cover that overhangs and protects the lower module positions. Both units include the cover, base, cable ties, Allen wrench, adhesive icon labels, and cover hardware. USO modules are ordered separately.

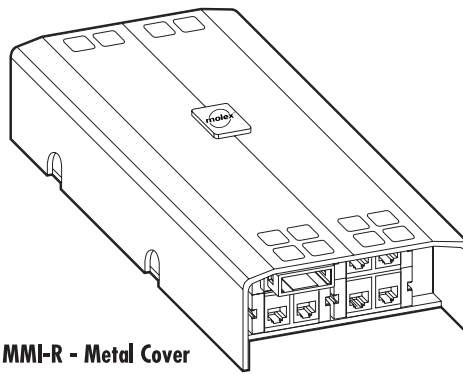

Specifications

MMI Dimensions: 97mm x 159mm x 57mm

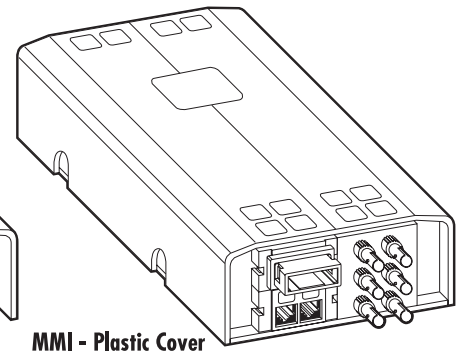

MMI Shipping Weight: 326g

MMI-R Dimensions: 222mm x 159mm x 57mm

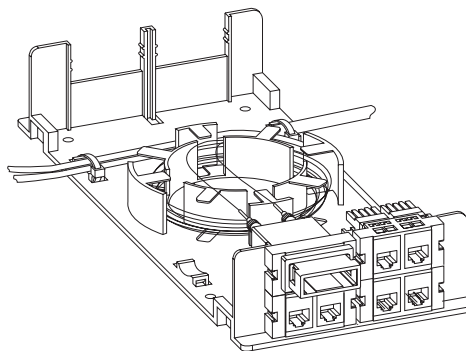

MMI-R Shipping Weight: 411g

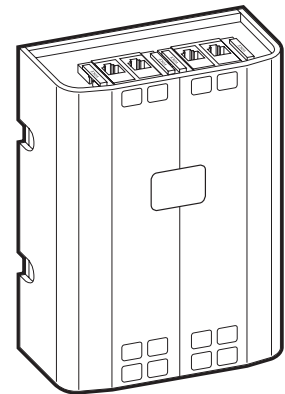

MMI-R - Metal Cover

MMI - Plastic Cover

MMI/MMI-R shown open. The MMI can be configured with any combination of UTP and fiber to satisfy many multimedia requirements.

MMI in Mounted Position
(8 ports located in the bottom position,
4 ports in the top)
