EUROLAN Patchpanel Angled

19" UTP/STP 48 x Keystone unloaded

Ordering information		
Part number	**E-number**	**Description**
27A-00-48BL		Eurolan Angled Patch Panel Snap-in 2U, 48port UTP/FTP

The angular construction of the panels makes it possible to direct the patch cords directly to vertical cable organizers without the use of horizontal organizers of cords. This allows to increase density of ports of the switching field.

It is recommended to use in cabinets and racks with vertical organizers.

Angular construction makes it easier to meet the requirements to a minimum bend radius and simplifies installation.
