

Divisible duct repair kit

The Filoform divisible duct repair kit is suitable for connecting and repairing subducts which contain a cable. Our divisible sealing system enables you to install it easily onto to existing installations.

By applying the locking keys onto the shells the rubber insert is compressed and creates a firm gas and watertight seal of 0,5 bar.

The locking keys can now also be mounted with use of pliers. The new grip rings create a high strain relief on the ducts. Suitable for blowing in new cables.

Features

- Gas and watertight up to 0,5 bar
- During 30 minutes up to 10 bar
- For connecting and repairing of damaged ducts
- Applicable for direct burying
- Suitable for retro fitting
- Easy installation
- Slim design
- Rubbers seals with color coding
