ABB is committed to continually promoting and embedding sustainability across its operations and value chain, aspiring to become a role model for others to follow. With its ABB Purpose, ABB is focusing on reducing harmful emissions, preserving natural resources and championing ethical and humane behavior.

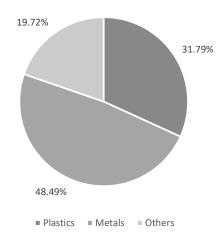

## **General Information**

Reference product	Frame 1gang Pur Edelstahl (2CKA001754A4317)
Description of the product	PC based frame that provide protection and eastetics to 1-gang BJE switch inserts
Functional unit	Protect persons during 20 years against direct contact with live parts of the "rocker switch mechanism", having the following dimensions 81.0x81.0x12.3 mm.
Other products covered	0

## Additional Environmental Information

Manufacturing	Manufactured by Busch-Jaeger Elektro GmbH at the Lüdenscheid factory, ISO 14001 certified.
Distribution	Transport between the last group distribution centre and an average delivery point in the sales area in Germany, Austria and Netherland.
Installation	For the installation of the product, only standard tools are needed. The installation stage includes the disposal of the packaging and the transport of packaging material to disposal.
Use	The product does not require special maintanence operations
End of life	The end-of-life stage is modelled according to PCR-ed4-EN-2021 09 06 and IEC/TR 62635.
Benefits and loads beyond the system boundaries	n.a.

## **Environmental impacts**

Reference lifetime	20 years
Product category	Other equipments
Installation elements	No additional elements needed during installation
Use scenario	Reference life time (RLT): 20 years
Geographical representativeness	Manufacturing: Germany.  Distribution, installation, use and end of life: Germany, Austria,  Netherlands.
Technological representativeness	Technological representativness: manfacturing of lightswitch frame representative of the year 2022"
Software and database used	SimaPro 9.4, ecoinvent 3.8, methodology PEF3.0

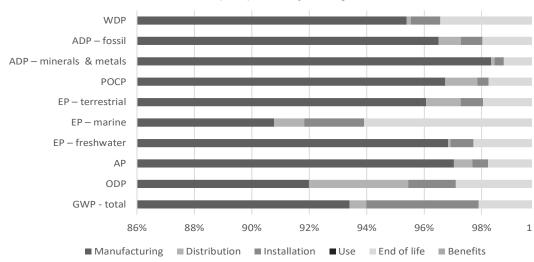

#### **Energy model used**

Manufacturing	Energy mix of medium voltage, solar and CHP for DE.
Installation	Data used to model installation element are representative of european electricity mix.
Use	n.a.
End of life	Data used to model installation element are representative of european electricity mix.

## **Environmental Impact Indicator Glossary**

#### Impact indicators

Indicator	Description	Unit
Global warming potential (GWP) - total	Indicator of potential global warming caused by emissions to air contributing to the greenhouse effect. The total global warming potential (GWP-total) is the sum of three sub-categories of climate change.  GWP-total = GWP-fossil + GWP-biogenic + GWP- land use and land use change	kg CO₂ eq.
Ozone depletion (ODP)	Emissions to air that contribute to the destruction of the stratospheric ozone layer	kg CFC-11 eq.
Acidification of soil and water (A)	Acidification of soils and water caused by the release of certain gases to the atmosphere, such as nitrogen oxides and sulphur oxides	H+ eq.
Eutrophication (E)	Indicator of the contribution to eutrophication of water by the enrichment of the aquatic ecosystem with nutritional elements, e.g. industrial or domestic effluents, agriculture, etc. This indicator is divided to three: freshwater, marine and terrestrial.	kg P eq., kg N eq., mole N eq.
Photochemical ozone creation (POCP)	Indicator of emissions of gases that affect the creation of photochemical ozone in the lower atmosphere (smog) because of the rays of the sun.	kg NMVOC eq.
Depletion of abiotic resources – elements (ADPe)	Indicator of the depletion of natural non-fossil resources	kg Sb eq.
Depletion of abiotic resources – fossil fuels (ADPf)	The use of non-renewable fossil resources in an unsustainable way (e.g. from material to waste)	MJ (lower heating value)
Water Deprivation potential (WDP)	Deprivation-weighted water consumption. Assesses the potential of water deprivation, to either humans or ecosystems, building on the assumption that the less water remaining available per area, the more likely another user will be deprived.	m³ e depr.

#### Resource use indicators

Indicator	Description	Unit
Total use of primary energy	Total use of non-renewable primary energy resources (primary energy and primary energy resources used as raw materials) + Total use of renewable primary energy re-sources (primary energy and primary energy resources used as raw materials)	MJ (lower heating value)
