

# Tools that work for you!

## Wiha's principles: accountability and innovations

Wiha has been manufacturing fastening and screwdriving tools for over 80 years. Our slogan "Tools that work for you" means constant interaction with professional customers and development work to solve their problems. Year after year, we create new, functional solutions to improve the safety, efficiency, ergonomics and sustainability of hand tools.

Wiha is one of the leading manufacturers of hand tools, application-oriented tool sets, sophisticated transport solutions and digital tools. Founded in 1939 as a small family business, Wiha is today considered an internationally networked company with locations all over the world.

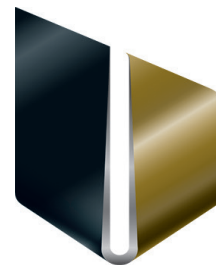

Wilhelm Hahn is continuing sustainable corporate development with courage and vision in the third generation. He steers Wiha into a strong future based on the values of responsibility, respect and integrity.

Professionals from sectors such as the electrical trade and industry have relied on working with Wiha for decades – as have partners from specialist retailers and ambitious do-it-yourselfers.

Regular awards for innovation, design and brand from competitions such as the "TOP 100 Innovation Prize", "iF Design Award", "Red Dot Award" underline the Wiha claim "Tools that work for you". The Federal Association of Small and Medium-Sized Businesses (BVMW) also recognized Wiha 2023 as an "Attractive Employer in Silver," which demonstrates the exceptionally high quality of corporate governance and focuses on employee satisfaction and promotion.
