

Item no. 770-1105/022-000

WINSTA® MIDI > Socket; with strain relief housing; 5-pole; Cod.
 I; 4,00 mm²; blue

Color:

Female connector/socket WINSTA® MIDI rated current
25 A

The WINSTA® MIDI female connector/socket with protection type IP20 supports fast, reliable installation. The pluggable installation connectors with spring pressure connection technology function entirely without screw connections. They allow resource-efficient, error-free installation in a large number of applications.

The color coding and mechanical coding of the pluggable installation connector ensure error-free installation of the individual components – including protection against mismatching. The pluggable installation connector offers protection against contact with live components in accordance with protection type IP20. WINSTA® MIDI pluggable installation connectors with I coding in blue are especially suitable for easy lighting installation, for example for the dimming of DALI lights. This pluggable installation connector can be employed for a load of up to 25 A. As a result, it can also be used for high power loads. The WINSTA® MIDI Pluggable Connection System with Push-in CAGE CLAMP® spring pressure connection technology facilitates exemplary electrification. Due to the included test slot, connections can be checked even when they are plugged in. That saves time and reduces installation labor and costs. A range up to 55 mm can be used for the strip length.

Push-in CAGE CLAMP® spring pressure connection technology – pluggable installation instead of laborious screw connections!

The WNSTA® Pluggable Connection System is perfectly tailored to the very strict requirements of building installation. It makes electrical installation pluggable, and consequently more efficient, more reliable, and error-free. Using this pre-assembled system decreases assembly times and installation errors at the construction site. Now you can also lower installation costs without compromising safety and quality. The WNSTA® MIDI pluggable installation connector with marking reduces the need for servicing and prevents unnecessary downtime.

- protection against mismating eliminates errors
- for automation controllers
- for intelligent, easy lighting installation
- ready for immediate use
- convenient installation and commissioning
