

Nexans art.nr.: 10255511

El.nr.: 1158200

GTIN: 7045210066715

BØYEBEGRENSER brukes for installasjon om bord på lektere eller andre fartøy som, som krever en landstrøms tilknytning.

BENDING-LIMITER is used to prevent kinks in the cable in the transition between the seabed and the vertical section.

Cable kinks tend to occur in cases where the cable is exposed to residual torsion and when the cable do not have enough streak.

Nexans has developed a BENDING-LIMITER, which is attached to fleet structure, where the cable comes into the fleet. This unit can also be attached parallel (horizontal) along a platform.

KARAKTERISTIKKER**Dimensjonsegenskaper**

Bredde	0,90 m
Høyde	1000 mm
Lengde	1000 mm
Vekt	60000 g
