

## Hole Dozer Holesaw - 73 mm - 1 pc | HOLE DOZER™ bi-metal holesaws

- Cutting edge technology for maximum productivity.
- Tooth design - A 3.5 teeth per inch tooth design with a positive 10° tooth angle provides the following benefits:
  - Faster and more aggressive cut.
  - Improved heat dispersion during cutting ensures that the teeth stay sharper for longer.
  - Deeper curved gullets provide more efficient chip clearance preventing clogging and heat build up.
  - Special shaped tooth angle has less tendency to snag on thinner materials.
  - Teeth are alternate/side set to minimise binding and friction.
  - Requires less feed pressure - This is achieved by the combination of aggressive tooth geometry and good chip clearance resulting in the requirement of less force during drilling.
