## Miniature circuit breaker (MCB), 125A, 2p, C-Char

Part no. AZ-2-C125
Catalog No. 211810
Alternate Catalog AZ-2-C125

**Delivery program** 

| Basic function                                  |                 |    | Miniature circuit-breakers                                     |
|---|-----------------|----|--|
| Number of poles                                 |                 |    | 2 pole   |
| Tripping characteristic                         |                 |    | C  |
| Application                                     |                 |    | Switchgear for industrial and advanced commercial applications |
| Rated current                                   | In              | Α  | 125  |
| Rated switching capacity acc. to IEC/EN 60947-2 | I <sub>cu</sub> | kA | 15   |
| Product range                                   |                 |    | AZ   |

## **Technical data**

| Standards                                       |                 |                 | EN 45545-2; IEC 61373                   |
|---|-----------------|-----------------|---|
| Rated operational voltage                       | U <sub>e</sub>  | V               |   |
|   | U <sub>e</sub>  | V AC            | 230/400                                 |
|   |                 | V DC            | 60 (per pole)                           |
| Rated switching capacity acc. to IEC/EN 60947-2 | I <sub>cu</sub> | kA              | 15                                      |
| Operational switching capacity                  |                 | kA              | 20                                      |
| Characteristic                                  |                 |                 | Similar: D, C                           |
| Max. back-up fuse                               |                 | A gL/gG         | 200                                     |
| Selectivity Class                               |                 |                 | Compliant with Class 3                  |
| lifespan  |                 |                 |   |
| Lifespan  | Operations      |                 | > 10000                                 |
| Direction of incoming supply                    |                 |                 | as required                             |
| Mechanical                                      |                 |                 |   |
| Standard front dimension                        |                 | mm              | 45                                      |
| Enclosure height                                |                 | mm              | 90                                      |
| Mounting width per pole                         |                 | mm              | 27                                      |
| Mounting  |                 |                 | IEC/EN 60715 top-hat rail               |
| Degree of Protection                            |                 |                 | IP20, IP40 (when fitted)                |
| Terminals top and bottom                        |                 |                 | Lift terminals                          |
| Terminal protection                             |                 |                 | Finger and back-of-hand proof to BGV A2 |
| Terminal capacities                             |                 | $\mathrm{mm}^2$ |   |
|   |                 | mm <sup>2</sup> | 2.5 50                                  |

## Design verification as per IEC/EN 61439

| Technical data for design verification                   |                   |    |   |
|--|-------------------|----|---|
| Rated operational current for specified heat dissipation | In                | Α  | 125   |
| Heat dissipation per pole, current-dependent             | P <sub>vid</sub>  | W  | 0   |
| Equipment heat dissipation, current-dependent            | P <sub>vid</sub>  | W  | 23.8  |
| Static heat dissipation, non-current-dependent           | $P_{vs}$          | W  | 0   |
| Heat dissipation capacity                                | P <sub>diss</sub> | W  | 0   |
| Operating ambient temperature min.                       |                   | °C | -25   |
| Operating ambient temperature max.                       |                   | °C | 55  |
|  |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| IEC/EN 61439 design verification                         |                   |    |   |
| 10.2 Strength of materials and parts                     |                   |    |   |

| 10.2.2 Corrosion resistance  | Meets the product standard's requirements.   |
|--|--|
| 10.2.3.1 Verification of thermal stability of enclosures   | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   | Meets the product standard's requirements.   |
| 10.2.5 Lifting   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |  |
| 10.9.2 Power-frequency electric strength   | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## **Technical data ETIM 8.0**

Circuit breakers and fuses (EG000020) / Miniature circuit breaker (MCB) (EC000042)

Electric engineering, automation, process control engineering / Electrical installation, device / Miniature circuit breaker system (MCB) / Miniature circuit breaker (MCB) (ecl@ss10.0.1-27-14-19-01 [AAB905014])

| Built-in depth  | mm              | 75       |
|---|-----------------|----------|
| Release characteristic  |                 | С        |
| Number of poles (total)   |                 | 2        |
| Number of protected poles   |                 | 2        |
| Rated current   | А               | 125      |
| Rated voltage   | ٧               | 400      |
| Rated insulation voltage Ui   | ٧               | 440      |
| Rated impulse withstand voltage Uimp  | kV              | 4        |
| Rated short-circuit breaking capacity Icn according to EN 60898 at 230 V    | kA              | 0        |
| Voltage type  |                 | AC       |
| Rated short-circuit breaking capacity Icn according to EN 60898 at 400 V    | kA              | 0        |
| Rated short-circuit breaking capacity Icu according to IEC 60947-2 at 230 V | kA              | 15       |
| Rated short-circuit breaking capacity Icu according to IEC 60947-2 at 400 V | kA              | 15       |
| Frequency   | Hz              | 50 - 60  |
| Current limiting class  |                 | 3        |
| lush-mounted installation   |                 | No       |
| Concurrently switching neutral conductor                                    |                 | No       |
| Over voltage category   |                 | 3        |
| Pollution degree  |                 | 2        |
| Additional equipment possible   |                 | Yes      |
| Width in number of modular spacings   |                 | 3        |
| Degree of protection (IP)   |                 | IP20     |
| Ambient temperature during operating  | °C              | -25 - 55 |
| Connectable conductor cross section multi-wired                             | mm <sup>2</sup> | 2.5 - 50 |
| Connectable conductor cross section solid-core                              | mm²             | 2.5 - 50 |
| Explosion-proof   |                 | No       |
