## Countless options

**The BR Series looks and feels high end.**

With 3D printing we unlock the possibility of 10 different materials and 5 textures. Together with all the different lighting options, this luminair will fit your project.

## Tailored to your preference

**Custom designs for demanding project needs**

With our flexible digital production system, our fixtures can be modified in a variety of ways. Contact us to discuss your specific needs.

## Fast lead times

**Custom options delivered fast**

We can supply a wide range of customization options without long lead times. Our revolutionary new manufacturing technology allows us to deliver unprecedented speed, flexibility and economy.

## Circular economy ready

### Fixtures inherently designed for low environmental impact

We optimize the design of our fixtures expressly to reduce our product's environmental impact: Lightweight materials reduce our carbon footprint during production and reduce the fixture's weight to minimize our transportation footprint.

## Glare free contemporary luminaire design

As high ceiling and open offices in old industrial buildings become more and more the trend of today, the form, fit and function of the BR Series seamlessly integrated into your project.

Not only black and white, but a multitude of materials and textures make sure the luminaires fit the branding.

## There is no ceiling wild enough

The different mounting options of the BR Series, recessed, surface mounted and pendant, make up a very flexible product family.

No need to vary with different products, styles, or even manufacturers, within your project. With all the options presented, the BR is the solution for all office and hospitality applications.

## When the application calls for flexibility

Often, offices, meeting rooms, open areas or entrances call for more than one type of luminaire. Think of desk lighting in conjunction with luminaires that provide environmental ambiance.

Being able to do that and making sure the lighting integrates with the right control system, fits the style of your room and gives you the most comfortable lighting available, then you must be talking about the BR Series.
