## Design verification as per IEC/EN 61439

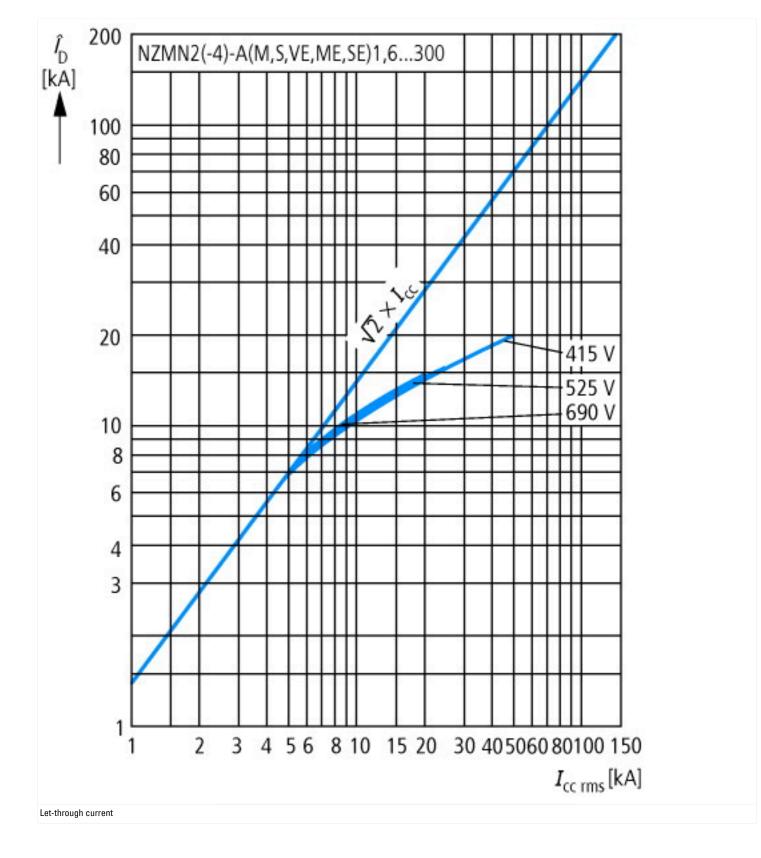

| Technical data for design verification                   |                  |    |       |
|--|------------------|----|-------|
| Rated operational current for specified heat dissipation | In               | А  | 250   |
| Equipment heat dissipation, current-dependent            | P <sub>vid</sub> | W  | 58.13 |
| Operating ambient temperature min.                       |                  | °C | -25   |
| Operating ambient temperature max.                       |                  | °C | 70    |

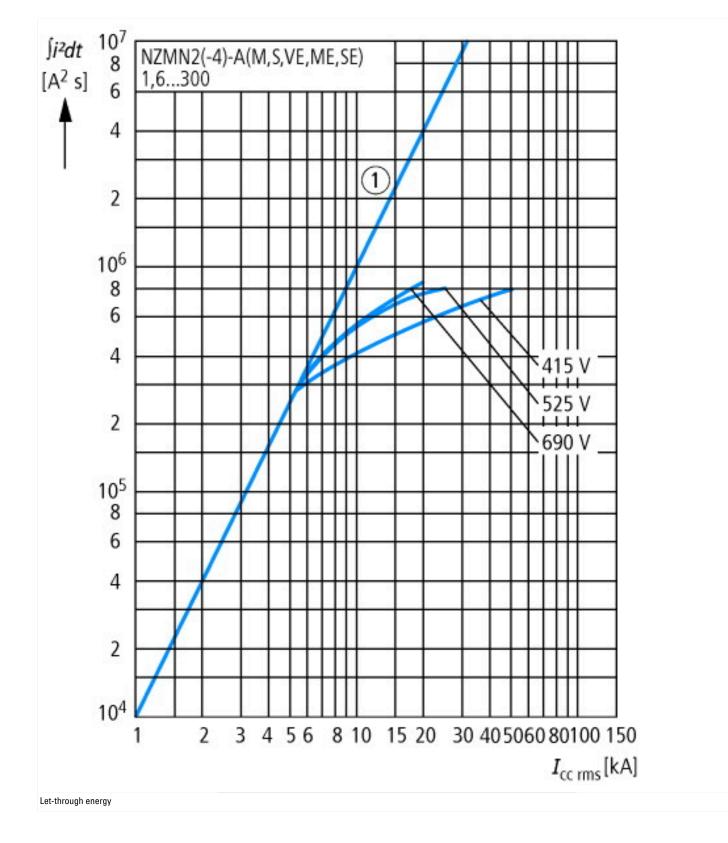

| C/EN 61439 design verification   |  |
|--|--|
| 10.2 Strength of materials and parts   |  |
| 10.2.2 Corrosion resistance  | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures   | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   | Meets the product standard's requirements.   |
| 10.2.5 Lifting   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |  |
| 10.9.2 Power-frequency electric strength   | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   | Is the panel builder's responsibility. The specifications for the switchgear must bobserved.                                     |
| 10.12 Electromagnetic compatibility  | Is the panel builder's responsibility. The specifications for the switchgear must bobserved.                                     |
| 10.13 Mechanical function  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## **Technical data ETIM 7.0**

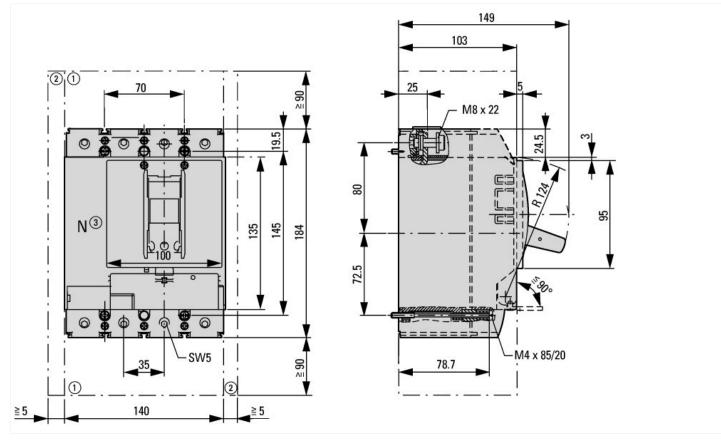

| Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC000228)          |                  |           |  |
|--|------------------|-----------|--|
| Electric engineering, automation, process control engineering / Low-voltage swi<br>protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013]) | tch technology / | Circuit b | reaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system |
| Rated permanent current lu   |                  | А         | 250  |
| Rated voltage  |                  | V         | 690 - 690  |
| Rated short-circuit breaking capacity Icu at 400 V, 50 Hz  |                  | kA        | 50   |
| Overload release current setting   |                  | А         | 200 - 250  |
| Adjustment range short-term delayed short-circuit release  |                  | А         | 0 - 0  |
| Adjustment range undelayed short-circuit release   |                  | А         | 6 - 10   |
| Integrated earth fault protection  |                  |           | No   |
| Type of electrical connection of main circuit  |                  |           | Frame clamp  |
| Device construction  |                  |           | Built-in device fixed built-in technique   |
| Suitable for DIN rail (top hat rail) mounting  |                  |           | No   |
| DIN rail (top hat rail) mounting optional  |                  |           | Yes  |
| Number of auxiliary contacts as normally closed contact  |                  |           | 0  |
| Number of auxiliary contacts as normally open contact  |                  |           | 0  |
| Number of auxiliary contacts as change-over contact  |                  |           | 0  |
| Nith switched-off indicator  |                  |           | No   |
| Nith under voltage release   |                  |           | No   |
| Number of poles  |                  |           | 4  |
| Position of connection for main current circuit  |                  |           | Front side   |
| Type of control element  |                  |           | Rocker lever   |
| Complete device with protection unit   |                  |           | Yes  |
| Motor drive integrated   |                  |           | No   |
| Motor drive optional   |                  |           | Yes  |
| Degree of protection (IP)  |                  |           | IP20   |
